Comment. The armored scout cars and other motor vehicles repeatedly observed at the plant on Gabrielerstrasse belong to the 13th Cds Mecz Div. Two new wooden garages were erected in the plant area in September 1951. One of the garages was to shelter armored scout cars, none of which had been observed before in Moedling. The armored scout cars usually seen in the garage on Permerstorferstrasse, Vienna, were no longer seen there recently.

It is therefore believed that the armored scout cars in the plant on Cabrielerstrasse, Moedling, belong to the motorcycle battalion of the 13th Cds Mecz Div which may have been transferred from Vienna to Moedling.
